Thursday, June 5, 2009 Well, here we are. You've waited through all the DLC announcements, the Gran Turismo 4 announcement, the Gran Turismo 6 announcement, the world cup and Madden NFL 09 announcements, and now we're finally here. I have high expectations for the Gran Turismo series. I think they have a good game, but I'm not sure the visuals are on par with the others. Plus, I have a game I really need to get to. But, we all know that Gran Turismo has put their other franchises on hold and has their best hopes on the next generation of consoles. I think it's a gamble that I'm willing to make, and I think that I can be pleasantly surprised by Gran Turismo 6. Like others, I've been having some trouble figuring out what exactly I should do. I do like the idea of having certain cars and vehicles in the game, though. I've been running cars by Street Fighter characters in the Street Fighter IV beta and they've felt pretty good. I'm not sure which cars will be available in the game and I'll probably be using the same cars that I did in the beta. I'm not sure what I'll do with the arcade version. It is my favorite version of the series. I might load it up with track editors to create my own tracks or add tracks for other games. I'd like to know if there are any other ideas on this matter. Left 4 Dead 2 for Xbox 360 The action takes place around the same time as the original, right after the outbreak that turned most of the population into various mutant zombies. . The game is based on collaboration. However, due to the increased complexity and variety, the developers decided to create a completely new game world. At the same time, they kept some elements from the first part, so that it would be easier for players to remember how it all began. This time, players will have at their disposal not one, but four heroes at once. Each has its own plot of events, which will depend on which ending you choose. Players will have to explore a new world that will consist of four different cities. fffad4f19a
