External links Category:WindowsQ: Adding a column to existing MySQL table I am using MySQL 5.5.21 I have a table that has many columns. I want to add a new column called user_id to the end of the table. I tried: ALTER TABLE tableName ADD user_id INT NOT NULL;. But this adds it to the existing table, and I don't want to mess with the structure of the table. I want to create a new table with that column. Thanks. A: You can use the RENAME TABLE command: RENAME TABLE TO .;. If the table already exists, drop it first: DROP TABLE .; That is, add an additional comma to specify the old_table name. A: Try this: CREATE TABLE tableName2(
