PageR Enterprise will help you monitor multiple systems on a Windows network. PageR Enterprise will allow you to have one central Event Console to monitor all your systems on your local or worldwide network. Key features of PageR Enterprise include: o PageR Enterprise is a fully integrated PC based solution for managing your Windows systems o You can monitor your systems remotely and provide alerts to technicians, managers and system administrators o Full data logging is included for a SQL database and Crystal Reports o A web browser interface allows you to log in and review all outstanding problems and troubleshooting o PageR Enterprise has integrated monitoring for many temperature and environment measuring devices such as Room Alert and TemPageR from Avtech as well as a number of other vendor's solutions for temperature monitoring

KeyMACRO Description: PageR Enterprise is a powerful program designed to help you monitor system, server and network systems based on Windows operating system. PageR provides a central Event Console that can collect, filter and display status or event information for all systems, servers and TCP/IP devices on your local or worldwide network. Events, whether normal status updates or critical warnings, can be flagged to automatically and immediately trigger alert notifications to personnel by mobile phone, PageR, PDA, email, broadcast message, fax, audio alert, log file update and more. You can even have PageR start executables, issue commands, launch applications or run complex Java or Visual Basic (VB) scripts when events occur. A web browser interface allows you to log in over the internet and review all outstanding problems. Full data logging is included with an SQL database and Crystal Reports. PageR Enterprise has integrated monitoring for many temperature and environment measuring devices such as Room Alert and TemPageR from Avtech as well as a number of other vendor's solutions for temperature monitoring. PageR Enterprise has enormous benefits when it comes to monitoring multiple devices on the network. For example, it provides a single management point where all devices can be viewed and set up. o PageR Enterprise is a fully integrated PC based solution for managing your Windows systems o You can monitor your systems remotely and provide alerts to technicians, managers and system administrators o Full data logging is included for a SQL database and Crystal Reports o A web browser interface allows you to log in and review all outstanding problems and troubleshooting o PageR Enterprise has integrated monitoring for many temperature
