Add a new layer The heart of any image editing task is the addition of a new layer. After you work on a photo, you may need to add a new layer to make adjustments to an existing area of the photo, or you may need to combine layers to create a new layer. In the Layers Panel, click the New Layer button and choose a name for the new layer (refer to Figure 6-6). Then choose a color for the new layer in the New Layer dialog box that's visible below the Layers Panel, as shown in Figure 6-7. ## Photoshop CC 2019

Giorgos Lanthimos made his directorial debut with "Dogtooth," the 2011 Cannes Film Festival hit that has since been blocked from general distribution. Now, just a few short years later, he's back with "The Lobster." The movie stars Colin Farrell as a man who's forced to become a "lobster," or celibate bachelor who lives in a hotel with a group of men. The only thing that can save him is to find a companion of his own sex. He can keep his citizenship of the sexy man's world, but he'll have to give up his reprieve in the human world. Everyone loves a dystopian sci-fi film, but "The Lobster" has a distinctly Greek identity. Although it was written by Lanthimos' brother, Efthymis, it's loosely inspired by his own experiences in the industry. In 2001, he was forced to seek work in Greece at the height of the country's economic crisis. As Lanthimos put it, "I was completely blocked and made to work." But he says that while he did endure, he also survived. "I somehow learned to create my own happiness." In his new film, there's a lot of discussion about what it means to be a good man. This is something that the audience understands on an emotional level. As Farrell puts it, "I know that I'd be a good husband, but I don't necessarily feel that I'm a good person." Like its predecessor, "Dogtooth," "The Lobster" delves into the themes of mortality. In the first film, Antonio Banderas' character is literally dying of cancer. In the second, his live-in girlfriend (Rosie Huntington-Whiteley) is dying of cancer. When the children of "The Lobster" begin to hunt down their counterparts on the human world, they realize that one of their most striking differences is that they don't age. The implications of this are much more philosophical in this film. As the boys age, they begin to lose touch with their individuality, losing track of who they are. Eventually, they're all replaced by a lost, displaced child. Like his last film, "The Lobster" is also a hybrid of comedy and drama, and it was produced by his brother, Efthymis. The two are known for their black comedies, and the genre continues in "The
