If you're looking for a simple software solution for creating and printing barcodes, Post Office Barcode Software is an excellent choice. Its intuitive interface makes it extremely user-friendly and you can use the program's powerful functions even if you've never used a barcode creator before. Create any barcode type and print it out Unlike most programs on the market, Post Office Barcode Software is not only designed for designing and printing barcodes. As you can see in the images below, the software includes six types of barcode, including the linear barcode, the postal product and the 2D barcode. You can also create customized barcodes. Because all the control panels are intuitively placed where you expect them to be, you will be able to create all the types of barcodes you need without needing to flip through each possible tab to find the one you need. As you can see from the images above, you can choose from two barcode styles: plain and landscape. You can also select among black and white, jpeg, tiff, bitmap, gif, png and bmp formats. You can also insert text and logos, define barcode size, print format, and dimension. If you're trying to create larger barcodes than what your printer supports, you can choose to scale the barcode to the required size before printing. Once finished designing your barcode, you can also define its position, header and footer. You can also choose to print the barcode vertical or horizontal. With Post Office Barcode Software, you can create custom barcodes so you can make your barcode stand out from the rest. You can also set barcode properties such as value, header and footer, and then fine tune the dimensions, position, color, scale, type, background, and width and length. After that, you can print your barcode in a single click. When the label is printed, you can also define how it should be rendered, such as creating a transparent background. Export your barcode to images in various formats, including JPEG, TIFF, Bitmap, PNG, WMF, EMF, EXIF, GIF and PDF. Practical software tool with many customization options To start designing your barcode, Post Office Barcode Software is intuitively placed and it puts many customization options at your fingertips. In addition, you can choose among six barcode types, including the linear barcode, the postal product and the 2D bar
