It is a complete application that allows you to create and manage exams and manage students. The following table gives you a brief overview of what you can do with TCEXAM: [+] Task Description Can produce and administer online tests (including learning objectives) You can create exams as a stand-alone online test or on an existing test (but you can also create exams as a Learning Objectives test) Administrate and distribute exams to students (including on-line administration) You can distribute exams through TCEXAM in many ways, for example: by email (user can be set to receive notifications about exams) by SMS (if the user has mobile phone) through different websites (an email is sent with the URL) TCEXAM can also manage students and their exams. You can add or delete students, create or delete exams, correct exams, give students study hints, set timing and re-schedule exams. TCEXAM includes a graphical editor to create exams in your own way. You can even create your own templates! Results TCEXAM allows you to receive detailed results for each question and each student. You can analyze the results according to students, date, or questions. You can easily compare your results with previous exams. Results can be automatically forwarded to different email addresses: teacher (if your teacher is logged in), student, administrator, and your personal email address (if TCEXAM is logged in). Synchronize data with several users and a server. You can add comments to each exam in the questions area, which means that exam can be commented by multiple users at the same time. Edit and make comments on exams Presentation TC

TCEXAM Crack+ [Updated]

KEYMACRO is a software solution for building adaptive tests. Keymacro gives the ability to create any kind of test, which may be adaptive or not. It also allows you to load responses (both multiple choice and fill in the blanks) into a test. Keymacro allows you to build an exam with any number of questions or sections. It can be adaptive or not. The system is 100% online and requires no local installations. Keymacro is also very customizable, allowing you to choose any combination of fonts, sizes, colors, and many other options. You can choose to ask any question in any language, as well as see the questions in any font type. Furthermore, Keymacro has a fully customizable question navigation system, a sample question generator, a help system with any number of examples and a PDF report generator. There is also the possibility of asking all the questions at once, or you can customize and save the order for each question. You can also enter the grade percentage for each question or answer. Keymacro also comes with a very detailed Help documentation, in both English and Spanish. Keymacro is also completely automatic, requiring very little user intervention. Features: - A full collection of customizable question types and answer types. - A fully customizable question navigation system. - Allows the user to display either a list of all the questions or a tree-style question list. - Allows the user to skip all the questions by simply pressing the space bar. - Allows the user to go back to any previous question by pressing the previous key. - Allows the user to go forward to the next question by pressing the next key. - Allows the user to go to any question by pressing the up key. - Allows the user to go to any question by pressing the down key. - Allows the user to go to the question by pressing the question mark. - Allows the user to display the answers in any available font and size by pressing the up key for multiple-choice questions and the down key for fill-in-the-blank questions. - Allows the user to display the correct answer by pressing the space bar. - Allows the user to mark the selected answers by pressing the right key. - Allows the user to view the correct answers by pressing the down key. - Allows the user to view all the answers by pressing the question mark. - Allows the user to show all the questions in a full screen by 1d6a3396d6

CBTExam is a web based software for is a web based software for generation, execution, evaluation and presentation of e-exams, called exam-electronic. It was developed to be used by the professional teachers in a School of Law and Social Sciences, it was developed to have low maintenance, to have a very high flexibility and to have a very high reliability. For this reason, it was developed by expert programmers with long time experience with databases, object-oriented programming and other web technologies. CBTExam has been already used and integrated in one of the most important Italian Universities (Padua) and in other Countries as well. is a web based software for generation, execution, evaluation and presentation of e-exams, called exam-electronic. You can also track and follow... ..in creating and managing lessons. It includes

What's New In?

CBTExam is a CBT management application that provides a complete and flexible platform for online CBT exams. With our product, exam content is online accessible by CBT examiners and exam takers. A typical CBT exam is composed by exam scripts, question pools, reference materials, test scripts, certification and results. CBTExam can manage these in multiple ways: You can design and develop exams as they are composed in a script file. In addition to standard CBT exam file structure (see exam scripts below), each script may contain a main question pool and zero or more sections with questions. Each question pool may be made up of a series of questions. Alternatively, you can design an exam from scratch. For this, you just create the question pools, reference materials and test scripts. By using the CBT Exam module, you can then attach and embed the question pools and reference materials in your exam, so that exam scripts are assembled automatically from a series of questions and references. It's also possible to design an exam with questions pools that use a reference script, or to attach a test script to a question pool. The CBTExam application allows you to configure how the questions in the exam script are generated, what results the examinee has to show and whether a question is repeated or not. Exams are easily prepared in advance, and there are many options for the packaging of your exam. You can generate e-exams through our web-based application, or you can use the CBTExam module to build exams on your own server. You can also integrate our application with any software you use for your daily tasks. CBTExam is an easy-to-use CBT e-exam solution that enables you to build, generate, schedule and manage CBT e-exams in the most intuitive and comprehensive way. It consists of a module for creating e-exams and an administration module that allows you to manage exams, question pools, question types, examinees and exam results. The CBTExam module consists of a question designer, a reference designer, a results module and a template designer. By using the question designer, question pool designer and results module, you can easily generate the e-exam from a question script. The question pool designer enables you to build exam pools with multiple questions, reference questions, a test script or a reference script. You can generate the reference material either by using the reference designer or by exporting a question pool to XML format. You can also import XML files that were generated by other CBTExam users. You can also manage question types, examinees and question order. You can also design the results, including the presentation of the results of the exam. CBTExam Administration: You can administer and manage all

System Requirements:

Minimum: OS: Microsoft Windows 7 64-bit (32-bit systems are not supported), Windows 8.1 64-bit (32-bit systems are not supported), Windows 8 64-bit (32-bit systems are not supported), Windows 10 64-bit (32-bit systems are not supported) Processor: Intel Core i3, 2.3 GHz Memory: 2 GB RAM Video: NVIDIA GeForce GTX 760 (2GB) or AMD Radeon HD 7970 (2GB) DirectX: Version 11 Storage
