Norton Safety Minder For Windows (Updated 2022)

Norton Safe and Sound™ simplifies mobile device security to quickly and easily provide full control over, and protection against, potentially damaging activities by children and teen users of mobile devices. Protect against: • viruses • malware • suspicious applications • online content • social media Protect your mobile devices by automatically blocking access to potentially damaging applications and content, while safely and conveniently helping to educate the user. Complete a risk-based assessment to determine what level of protection is needed for each user on your mobile devices and only provide those services to the user that you deem safe and right for the device being used. With Norton Mobile Security, you can restrict access to sensitive information, and ensure that your children and teens use your mobile device only for activities that you deem safe and appropriate. Simply add accounts and determine what level of access you would like to give to each account. Who is it for? Norton Safe and Sound™ is a mobile device security service designed for parents, guardians, and business owners who wish to provide effective and safe mobile device security to their children and teens. Features: • Block access to potentially harmful applications • Clean up apps and data to protect your mobile device • Offer information about potentially harmful apps to the user • Assess risk based on current activity to determine the level of protection • Protect users' data from malicious attacks • Alert parents via text message and e-mail • Help parents easily control and restrict access to social networking apps • Share and download logs of restricted applications to a secure cloud based service How does it work? Norton Safe and Sound™ is a mobile device security service designed to provide parents, guardians, and business owners with control and protection of children and teens' mobile devices. Simply add accounts and determine what level of access you would like to give to each account. The service will then automatically block access to sensitive information and protect your mobile device from potential risks. In addition, the service can also help protect your child's or teen's mobile device by informing them of the risks associated with various applications and providing the means for them to control and manage their device. Norton Safe and Sound™ will not modify or install any apps or content. The service uses the existing applications and content on the mobile device, and makes use of the mobile device's various native features for protection. iOS: iOS: Norton Mobile Security Description: Norton Mobile Security is designed to provide effective
