The Witcher 3 requires a 64-bit operating system, Windows 7 or later, and a video card that supports DirectX 11. Windows XP, Vista, and 8 are not supported. Q: Apex:OutputText with a parameters fails when a custom component is on the form I have a visualforce page which has a custom component on it. The custom component takes input from a form and then passes the data into an Apex controller action method. I would like to be able to output some text in the page at the end of the custom component's form
