Det skal være aktuelt for våre utenrikspolitikere å snakke om økt økonomi og utenrikspolitisk samarbeid med Russland. Det skal være aktuelt at vi kaster oss inn i kjøtt og gør oss av med gamle industriområder med høyt forbruk av dieselolje. Det er aktuelt å ta vare på verdens samfunns økologiske kollaps og ikke bare fortsette som før, men å jobbe for å gjøre verden bedre. Q: Deleted files on remote server still showing up in desktop I uploaded a couple of very large files (12gb each) to a remote server with SFTP. The files are there, and in the directories they should be. However, when I connect to the remote server via SSH, I can see the files in a directory in my desktop (Mac OS X). I don't see them in the directories in terminal or any other applications. Is this normal behavior? I want to be able to find these files but it's still showing up in my Mac desktop? A: That is because the files are still there on the remote system, just not in your default directory because you haven't asked for them. Mac OS X by default uses the Finder to manage its desktop, so it will show the same files it will find on a local drive. If you want to be able to see the file, move it
