“Football is an incredibly complex sport with lots of moving parts,” said Aidy Bryant, FIFA lead gameplay designer. “We also wanted to make sure the game captured players on their best day.”

New Features

New Player Balance Every player is enhanced with key elements, making players feel more balanced on the pitch – specifically the speed and power of their runs, and their acceleration, passing, dribbling, and crossing abilities, said Bryant.

Big Passes, Small Passes, and Purposeful Dribbles While most players in the game will still be able to perform a variety of moves – like turns, one-timers and overhead passes – players can now create even more passes. Players can no longer set up a flick-on or incipient pass. A player has to make a bigger move to create a pass – with larger passes creating a clear shot at goal. Combining this with fewer defenders, the game also helps players manipulate the defensive line in order to knock out an opposing player, said Bryant.

Workrates The workrate, or exertion, of each player has been carefully balanced across the pitch. New passes, new runs, new strikers – everything needs work. In addition to this, players’ “animation timing” has also been adjusted to better reflect real players. This includes the timing of when players stop and start their animation – for example, a midfielder goes through several animations before stopping, and as the player comes out of a run, they can take the shortest animation path.

New Defensive Behaviour The AI team have committed to developing defensive behaviour – working together to defend in one of four different ways. “When a player leaves the pitch, we want the AI to move to another part of the pitch and share the workload. We want them to share the work between the players and the teamwork of the team and that’s why the AI has to move

away,” said Bryant. The result of this team work and defensive strategy – some times 2 players switch position, some times both share and the role swap becomes more fluid and more inter-connected. New Difficulty Settings The match difficulty settings provide players with a range of objectives to compete with in FIFA games. The new match difficulty settings will offer a more challenging, realistic experience. New Activities and

Want to enjoy the beautiful game the way it was meant to be played? Then Ultimate Team was designed for you. Build your dream squad – from top stars to emerging prospects – and take on the world’s best players. Want to relive the glory of past glories? Earn great players by winning matches, competing in weekly tournaments, and completing player challenges. Ultimate Team is FIFA at its best! FIFA PlayStation Vita is the ultimate edition of the FIFA franchise. Take your FIFA experience to a whole new level, featuring the most accurate and immersive touch controls on mobile devices. With PlayStation Vita, FIFA fans will experience gameplay across all modes and disciplines, giving players the opportunity to compete on the world’s top courts and pitch for glory in nearly 80 countries. The FIFA games are still at the top of the game but they are now more accessible and more playable than ever. The PS Vita version has been completely redone with better controls, on-screen talent, more data, and more customization options. I can’t think of a game that is more intuitive and more accessible than the FIFA series. You can still play with a controller but it is designed from the ground up to work with the touch controls on your PlayStation Vita. The subtle handling and responsiveness makes the gameplay even more enjoyable, realistic, and immersive, and brings the sport to a new level! These new controls work seamlessly with touch. Additionally, all of the game modes can be played with the PS Vita’s “Edge Motion”, which lets the system recognize a player’s motion direction to make controls easier and more intuitive. Other new features include a drag-and-drop Quick Clubs feature and the addition of the popular Ultimate Team mode to the game – allowing for more options than ever before to create teams. And, as always, you get to create your very own personalized player. A new “Power Player” feature allows for quick, easy player switching, which makes the process of choosing your favorite 11-player lineup go even faster. And, with the “Club Experience” feature, you can virtually train and play with your favorite players, including your favored 11. If you are looking for an even better FIFA game experience then get your hands on FIFA PlayStation Vita. It is better than ever! DEFINITIVE FIFA PERFORMANCE With a host of new features for the ultimate FIFA football

experience, FIFA PlayStation Vita offers stunning visuals

What's new:

- **Navigation:** Rebuilt navigation system, experience one of the largest game engine ever, fast bringing you a new experience in gameplay.
- **New game engine:** The world's most complete football engine is designed specifically for this title, with enhancements for this title including changes to physics, animation and audio.
- **New features:** Watch players react to the goalkeeper's goal line prompt, and the distinct pattern in which they mark the ball for strikes with their feet, jump, and rolls. Whether it's trying to boot the ball or nudge it into the net, watch players react with confidence to new prompts, making them more responsive and creating more variety, while also giving them time to think before doing what they're encouraged to do.
- **Goalkeeper:** Most goalkeepers are never tested in the trial we place them in at birth, so they learn their craft from watching footage of others. In FIFA 22,

we set up a series of cues that will simulate the goalkeeper's visual and haptic feedback in a more realistic fashion. Using new technology, we create a visual representation of your keeper's experience against each shot, providing feedback and challenges on how to keep the ball out.

- Emotions: The most successful managers are able to communicate with their players using a variety of colorful words and phrases. Help your players stay motivated and work together through emotions and celebrations. Develop a personal skill set to qualify, make the most of your Man of the Match, and don't get sat down.**
- Man of the Match: Come up with a clever way to motivate your players, and reward successful managers by demonstrating the love of the fans through Man of the Match awards and celebration packs.**
- Heads-up: Seeing and reacting to shots right in front of you is difficult but key in every player's game. In FIFA 22, we use a new camera for better shots consistency**

and added depth, as well as reduce simulation lag allowing for better control. Position yourself close to the ball with the Smart Shot Motion Control feature, and the automation adjusts to the type of shot and goal-line.

- **Team Skills:**
