Photoshop 2021 (Version 22.4) Crack+ With Registration Code

* _Adobe Photoshop CS_ is the latest version, but this book isn't about the latest version. * You can preview the images created from this book in the Chapter 8 "Thumbnail Preview" or open a labeled copy of the final images on the companion disk in your root Windows directory. ## Getting Started in Photoshop You might wonder why you'd want to edit images. After all, a digital camera has good resolution and color, and most people want only the best image of their kids or pets. Shouldn't you just let them be? Sure you do, but if you really want to have your images look their best, then Photoshop is the way to go. Photoshop really can do so much. Although we may see it used for many odd jobs, one of the more popular ways to make images look their best is to edit them in Photoshop. The tools are good, and the people who use them are great. In this book, I use Photoshop for the following purposes: * Editing a photo to include filters or special effects. * Creating a special effect for a photo or graphic. * Improving an image to remove imperfections or alter the colors. ## Opening and Saving an Image As a photographer, you probably know how to get an image from the camera and into your computer. The same concept applies to editing photos in Photoshop: 1. **Open the image you wish to edit.** You can select the image from your computer's hard drive, a CD or DVD, or an external drive. In the Mac version, click the arrow to the right of the image to choose among the images on the hard drive. 2. **If you're on a Mac, click File** ⇒ **Open or Open Recent** to open the image in Photoshop. If you're on a Windows computer and have selected to display all of the images on your computer, double-click the image to open it in Photoshop. 3. **Either choose from the File menu or select the image from the list on the right side of the Photoshop window.** If you see a yellow warning box near the bottom left of the window, choose Safe to continue. Figure 1-1 shows the Photos window on a Mac and the Common Places window on Windows. 4. **Click the File menu and choose Save or press Shift+S.**
