Search July 2012 NEW YORK, July 24, 2012 /PRNewswire/ — The record-breaking \$500 million MacArthur Foundation "Genius Grant" program continues its most successful year ever. So far, 26 of the program's 450 applicants have won the Macarthur Foundation's \$625,000 annual MacArthur grant, accounting for almost ten percent of all applicants. "In the last four years, we have expanded the availability and improved the quality of the program. We have tripled the number of grant recipients, supported an extraordinary number of research projects and awarded 44 awards in the first few weeks of the year. Of the 26 recipients who have taken a big step toward their academic future, all have shown tremendous promise. After reviewing everything we know about this year's recipients, we are really pleased with how well the program is working," said Gordon Winbush, Director of the MacArthur Foundation. "

Full .Endoscopic removal of a calcified bile duct foreign body. A case of endoscopic removal of a calcified bile duct foreign body is reported. Endoscopic retrograde cholangiography demonstrated a sharp stone in the major bile duct. Endoscopic sphincterotomy was carried out. The stone was fragmented and extracted by a retrieval balloon catheter. This technique should be considered when the stone has a central axis and is not soft or fragmented. It is less invasive than the conventional techniques.Q: If \$f(x)\$ is continuous, \$g(x)\$ is differentiable and \$f(x)=g(x)\$ for \$x=a\$ and \$x=b\$, then \$g'(a) = f'(a)\$ It is easy to show this for \$f(x) = g(x) = x\$. But if \$g(x) = \sqrt{x}\$, I know that I can do this by using the Taylor Expansion. But how do you show it in general? A: We have: \$\$f(x)=g(x)=g(a)+\frac{g(b)-g(a)}{b-a}\$. Now substitute \$x=a\$ in \$(2)\$ to get: \$\$f'(a)=g'(a)+\frac{g(b)-g(a)}{(b-a)}+\frac{g(b)-g(a)}{(b-a)}\$.
