player.

- **FIFA Ultimate Team** earnable cards that replace existing game currency.
- **Redesigned (i) Formation tool** allows you to quickly adjust the defensive shape according to the opposite team's offensive shape. **(ii) In the second-half switch** you have the real-time chance to seal a deal with a decisive run up the middle. **In the final third** you can set an overlapping run to spring-off a breakaway.
- **With the new Direct Impact System** you'll feel a more natural, better paced ball motion which also allows for more variations. You're now able to use ball movements that increase the ball speed.
  - **Direct In-Play Impact (IG)** - choosing the best option for a ball movement, or performing it manually. **Additionally, the direct in-play impact is now affected by small on-field changes using interactive Rubbing rules. Crouch, slide, angle, or run, the best combination is always at your disposal.**
- **New open-field transitions** - such as one-for-one, no-space or, finally, double knock-down transition.
- **A survey tool is making cards cheaper.**

**FIFA is the world's leading sports video game, and we're helping make it even better than ever. We are the Official Sports Game of the 2018 FIFA World Cup™. Does FIFA need a real-world license? It's more than just a video game. FIFA is a sport that's played in the real world and has real fans. We understand the world of football - we live it every day - and that's why we're using the sport to bring players closer together around the world than ever before. How do we make EA SPORTS FIFA feel different from other video games? With**

**more than 100 years of football experience under our belt, we've crafted a unique FIFA experience that feels real and authentic, not real but authentic. We've combined traditional gameplay concepts with a new take on the way we make video games. Why did FIFA 21 release so late? It's a unique game for EA SPORTS FIFA and, before this, we haven't had that type of game at this scale or depth, while delivering all the core features the fans of football expect. We didn't want to rush. The last thing you should do is rush the game you want to put your stamp on. We felt that a couple of years would allow us to do that and it's already paying off for the fans. Who was involved with the creation of FIFA 21? Our creative development team led by Executive Producer Matt Bromell and Creative Director Mark Reeves worked with our technical and engineering teams to create a more authentic, simulation-based approach to gameplay with the goal of taking our football experience to a whole new level. This new approach harnessed the power of our new Frostbite engine, a game development platform that also powers Madden NFL 25 and more than 100 other titles. Frostbite delivers EA SPORTS FIFA's signature 'Athlete's POV' photography and player movement, coupled with near-perfect collision physics, amazing character models and a wide range of new visual technologies that add depth to the game and drive storytelling. What is the Frostbite Engine? EA SPORTS FIFA 22 was built using the Frostbite game development platform, which means the game looks and plays like FIFA on the pitch. It is more advanced than most other video game platforms and allows us to create a world-class game**
