Now, I would like to extend this general authentication to a username and password authentication. This is the function I implemented to handle the authentication: func authenticate(service: String!, completionHandler: (Bool, NSError?) -> ()) { let localAuthenticationOptions = LAContext() localAuthenticationOptions.delegate = self let authenticator = LocalAuthentication.authenticator(authentication: service, localAuthenticationOptions: localAuthenticationOptions) authenticator.authenticate {(status, error) in if error! = nil { print(error.localizedDescription) let alert = UIAlertController(title: "Error al iniciar sesión", message: "Error al iniciar sesión con el Servidor", preferredStyle: UIAlertControllerStyle.alert) let okAction = UIAlertAction(title
