Using this data in the game, and some of the world's most renowned football coaches, players and scientists in tandem with our gameplay development team, FIFA 22 is driven by intelligent AI, which incorporates this data to drive the sport's emotion throughout gameplay. The specific details of the new technology are also kept secret for now but we've obtained some exclusive information about a few of the features on offer. FIFA 22 will feature: >> As we were preparing for FIFA 21, we listened to feedback on core systems. The one thing we heard over and over again was that it is key to make FIFA feel like a real football game, so we increased the speed of the ball and we now have more speed in the match. >> We also took a hard look at the pace of the game. Not only were we looking at the speed of the ball, but we also wanted to make sure FIFA supported high-speed play. We've increased the number of tackles, and combined this with the speed of the ball and the increased pace of the game, we've managed to increase player reaction times to a level that replicates a high-speed game, even at the highest setting. >> We wanted to make sure that every moment of every game felt like a football match and felt as fast as a real football match. Because of this, we didn't want to use something that was gimmicky and didn't feel like a football game, and you're seeing the result of that. We've managed to increase the speed of the ball and create some of the fastest football matches that we've ever made. >> In the game you have the 'Intelligent AI' system, which is the core of gameplay. The DICE engine has a rigid structure. The AI is a major component and we had to make sure that it was intelligent enough to manage the game and make sure that the game felt like a football match. When we looked at how we can bring the speed of the ball and the authenticity of a football match into the game, we decided to include some of the high-speed elements we talked about. We've managed to use a rigid structure and the DICE engine to create the fastest, most authentic football match in the history of the series. >> We've also managed to implement a number of different systems that allow us to capture

### Fifa 22 Features Key:

- Introduces "HyperMotion Technology," the intelligent artificial intelligence and motion capture tools that made its mark on last year's FIFA. Features real-life player movements, tackles and more to impact your gameplay.
- Reintroduces Recoil Force Feedback, for more authentic ball physics in the best-selling FIFA ever made.
- The one-touch passing and dribbling system makes ball control and player movement easier than ever. Track-passing gives defenders the ability to predict your next move and help neutralise your attack.
- Smart cross-foot and off-beat twists and spins give the typical swerve of a pass new life. First touch makes every touch an adventure and lets you take advantage of new gameplay possibilities.
- 17 national teams from around the world will be available, including the All-New Brazil 2014 FIFA World Cup™ Edition.
- 23 Club Teams to develop and play for. Choose your Club Team (Club Tico), improvise your style with real kit, play with your chosen Engine of your dreams (Air, Earth and Water) and truly personalise your Club Team.
- Skill cards and runes give you the chance to turn your favourite players into the most sought-after players in the game.
- Huge Stadiums with multiple action areas, where masterful dribbling moves become more important than ever.
- 4 star-studded Skill Games can add a new dimension of football spectacle. Can your team execute to perfection when nothing is given and the clock is ticking down?
- Increased variety of Skill Games: Simple, Medium and Hard! Every game will now feature three Skill Games that will truly add an element of fun to the action.
- The most important feature of all: Every one of the advertised new games has been carefully balanced for real football. Every single new game has been fully playable in all general gameplay modes, including new Skill Games.
