In addition, a new "Attack Zone" that gives players an option to control the direction of their shots and other offensive actions has been created in FIFA 22. Players can use the new feature by holding R2 in "Classic" difficulty to choose an Attack Zone for offensive actions. Beyond gameplay features, FIFA 22 also introduces "Assist Mode," which allows players to pick the position of up to five other players and has significantly enhanced Coach and Manager options. In Career Mode, the "Development Draft" can now be used to attract new players and bring high-quality youth talents to a team. Also, a coach's experience grows over time. Players can also be sent out on loan and returned to their clubs. All these features are embedded in a refined gameplay experience designed to make a FIFA soccer experience more realistic, efficient and satisfying than ever before. FIFA 22's Ultimate Team game mode has been significantly enhanced. Players can now challenge for better rewards and, with the revised FIFA UPlay Points system, a better chance of obtaining the gold. FIFA 22 delivers a comprehensive range of improvements that allow players to enjoy their favorite team at the highest level of skill. The improved game engine delivers smoother player animations, a more dynamic player collision system, reactive defenders, dynamic crowds and more realistic balls physics. In addition, the gameplay is enhanced with refined passing and shooting mechanics, which help players to achieve better accuracy on long passes, as well as more improvisation in tight spaces. FIFA 22 will be released for PlayStation 4, Xbox One and PC on September 27, 2017. For more information and additional screenshots, please visit [www.FIFA.com/football](http://www.FIFA.com/football). Key Features New Attack Zone The new Attack Zone gives players an option to control the direction of their shots. It can be selected by holding R2 in Classic difficulty and is activated for a 5 seconds. The feature is now accessible in all difficulty levels. Here are some shots taken from Attack Zone in "Pro" difficulty: On the left, players are able to shoot the ball along the width of the pitch in a desired direction. On the right, players can control the direction of the ball more precisely by choosing between a vertical and horizontal mode. In addition, players can vary the distance, from short to long passing options.
