Ebooks are a digital copy of the book. They are an object that contains the book. What you are asking is to host the ebook yourself. That's not what sites are for. I'm assuming that the author cannot provide the ebook as a non-DRM pdf. If not, you could generate a format that is readable by the software that they supply and host that. But it's their responsibility to make it accessible, and the end user's responsibility to access it. The value of sites like this is that they present books in a way that is

accessible to the general public, with a couple of clicks, and is reasonably priced. The site is fully secure and the files are adequately secured, so that casual peeking is not an issue, and the files are not being shared. The author should provide the ebook as a non-DRM pdf, and you should host it. 1. Field of the Invention This invention relates to an image reading apparatus for use, for example, in a scanner. 2.

Description of the Related Art Conventionally, a copying machine including a scanner for scanning the surface of an original to read the image of the original is known. The scanning original is such as that with halftone dots and in a solid color, and includes the light

of a predetermined wavelength, reflected by the surface of the original, as the image of the original and received by an image sensor.
