

i am getting error lg.adapter.initializationfailure when i search for my phone through find my phone. and when i am connecting my laptop via usb cable i am getting message of usb device not recognized, try connecting with another usb port and restart the device. i have checked my phone with xtrairight tool and firmware version is on 6.0.1. i have successfully downloaded and installed the open-source firmware for lg g4 h815 (readme file provided) on my computer but when i try to flash it on my phone it says lg.initializationfailure error and when i try to connect the phone with my laptop and try to flash it again it says lg.initializationfailure again. what should i do? lg g4 got the android 6.0 marshmallow update back in the october. unfortunately the update was available only for sometime and then lg shut down the marshmallow update for lg g4. some of the users were successful to get the marshmallow os on their lg g4 and others who didnt, can also update their lg g4 h815 to 6.0 marshmallow through our previously published article (here), however there may be some users who want to downgrade lg g4 h815 to 5.1.1 lollipop after spending some time with 6.0 marshmallow os. so, all who are willing to downgrade lg g4 to 5.1 lollipop stock firmware can follow this tutorial. to install 5.1.1 lollipop firmware on your lg g4 h815, download the kdz firmware file from the download section below. you should download the kdz firmware file of the same variant as your lg g4. if you have the kdz firmware of any other variant than h815 then you must not install the kdz firmware of h815 on your lg g4. it will damage your lg g4 h815 and can brick your lg g4. you can learn more about this in our lg4 firmware kdz page.
